

27 June - Andrew at Train Mountain

we took all morning before headin to the track,Andrew caught up with me, ian and cathrine, Kevin and Shana. So we got to train moubntain where we then split thetrain intot hethree carriages for the 49 and the 4 for the Y121. It was thnto the tracks. With andrew driving on train mountain track it was fitting he derailed within 300 meters of our camp. He actually derailed backwards ata signal, bad track join.Ok int he right direction - andrew!

We went around the south for the rest of the day and a bit of the night. With Steve,Datren and Greg & fatyher all now at train mountain we planned for a trip to the northern leg, and a prepared time to go and lots of food and drink. As usual whenever a chance presented the loco owners often had the flap or body up explaining the details of their particular loco.

So we ate around the the railway that night.
